

# Château Montrose

## Vintage 1973

---

### Main characteristics of the vintage

The early and fair spring favored the vine growth. A sunny June (mid-blossoming on June 11th) allowed a good fertilization. The fair weather maintained till August 15th. Then, rain spells occurred with changeable and cloudy skies, followed by low temperatures for the season. September alternated with sun, clouds, and average temperatures.

The crop was of a very good quality and maturity.
